En raison du matériau utilisé dans la fabrication du mécanisme, un effet de grincement peut apparaître avec le temps. Le fabricant suggère d'utiliser un spray de préservation/entretien de l'acier.

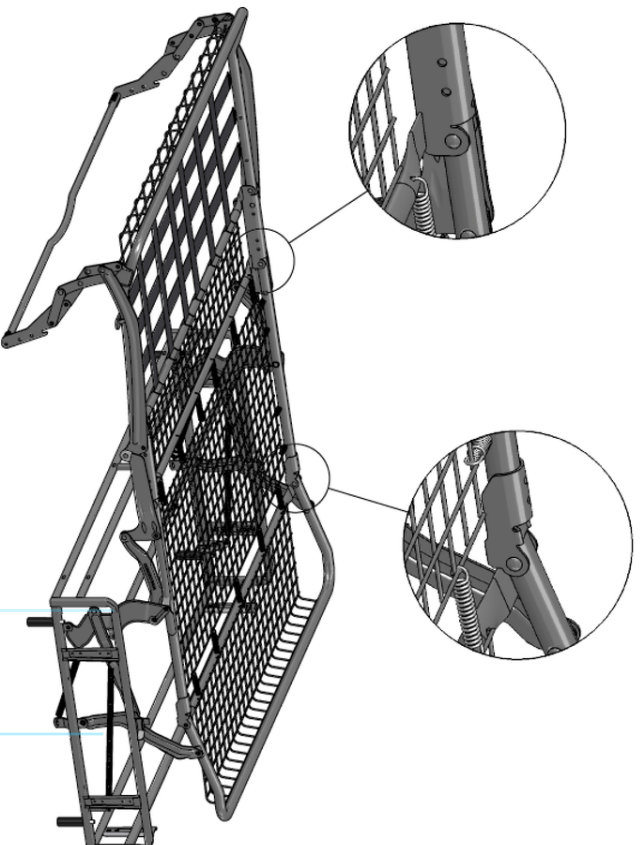

# All about MAINTENANCE POLICY

Thank you for choosing us, the mechanism you are using is one of the safest and most tested in the world and has been produced for over 20 years. Like any mechanical product, it is important to give it the right attention so that you can always use it at its best.

You can lubricate the sensitive points with any bicycle lubricant.  
Be careful not to use unlocking products, only lubricants.

It is important to lubricate and clean the joints between the pipes periodically, depending on the frequency of use.  
We recommend lubricating the central contact part.

It is also important to lubricate the joints correctly.

## Recommended operations

1. Remember to lubricate the mechanical joints periodically, as shown in the figure below, to ensure the best possible use and prevent noise creation.

2. It is advisable to use the mechanism as correctly as possible, they are durable if properly maintained.

## Not recommended operations

1. It is forbidden to close objects that are not part of the mattress inside the mechanism, such as blankets or pillows, in order to avoid deformation.

2. This mechanism has been tested and developed for quality sleep; any other action could impair its correct functioning.
